EVERYONE IS TOKENIZING ASSETS.

Assets are moving on-chain.

Tokenization solves availability not distribution, portfolio management or execution.

INDEXLA turns tokenized assets into investable, distributable products.

ON-CHAIN

ON-CHAIN ASSETS NEED AN INVESTMENT LAYER.

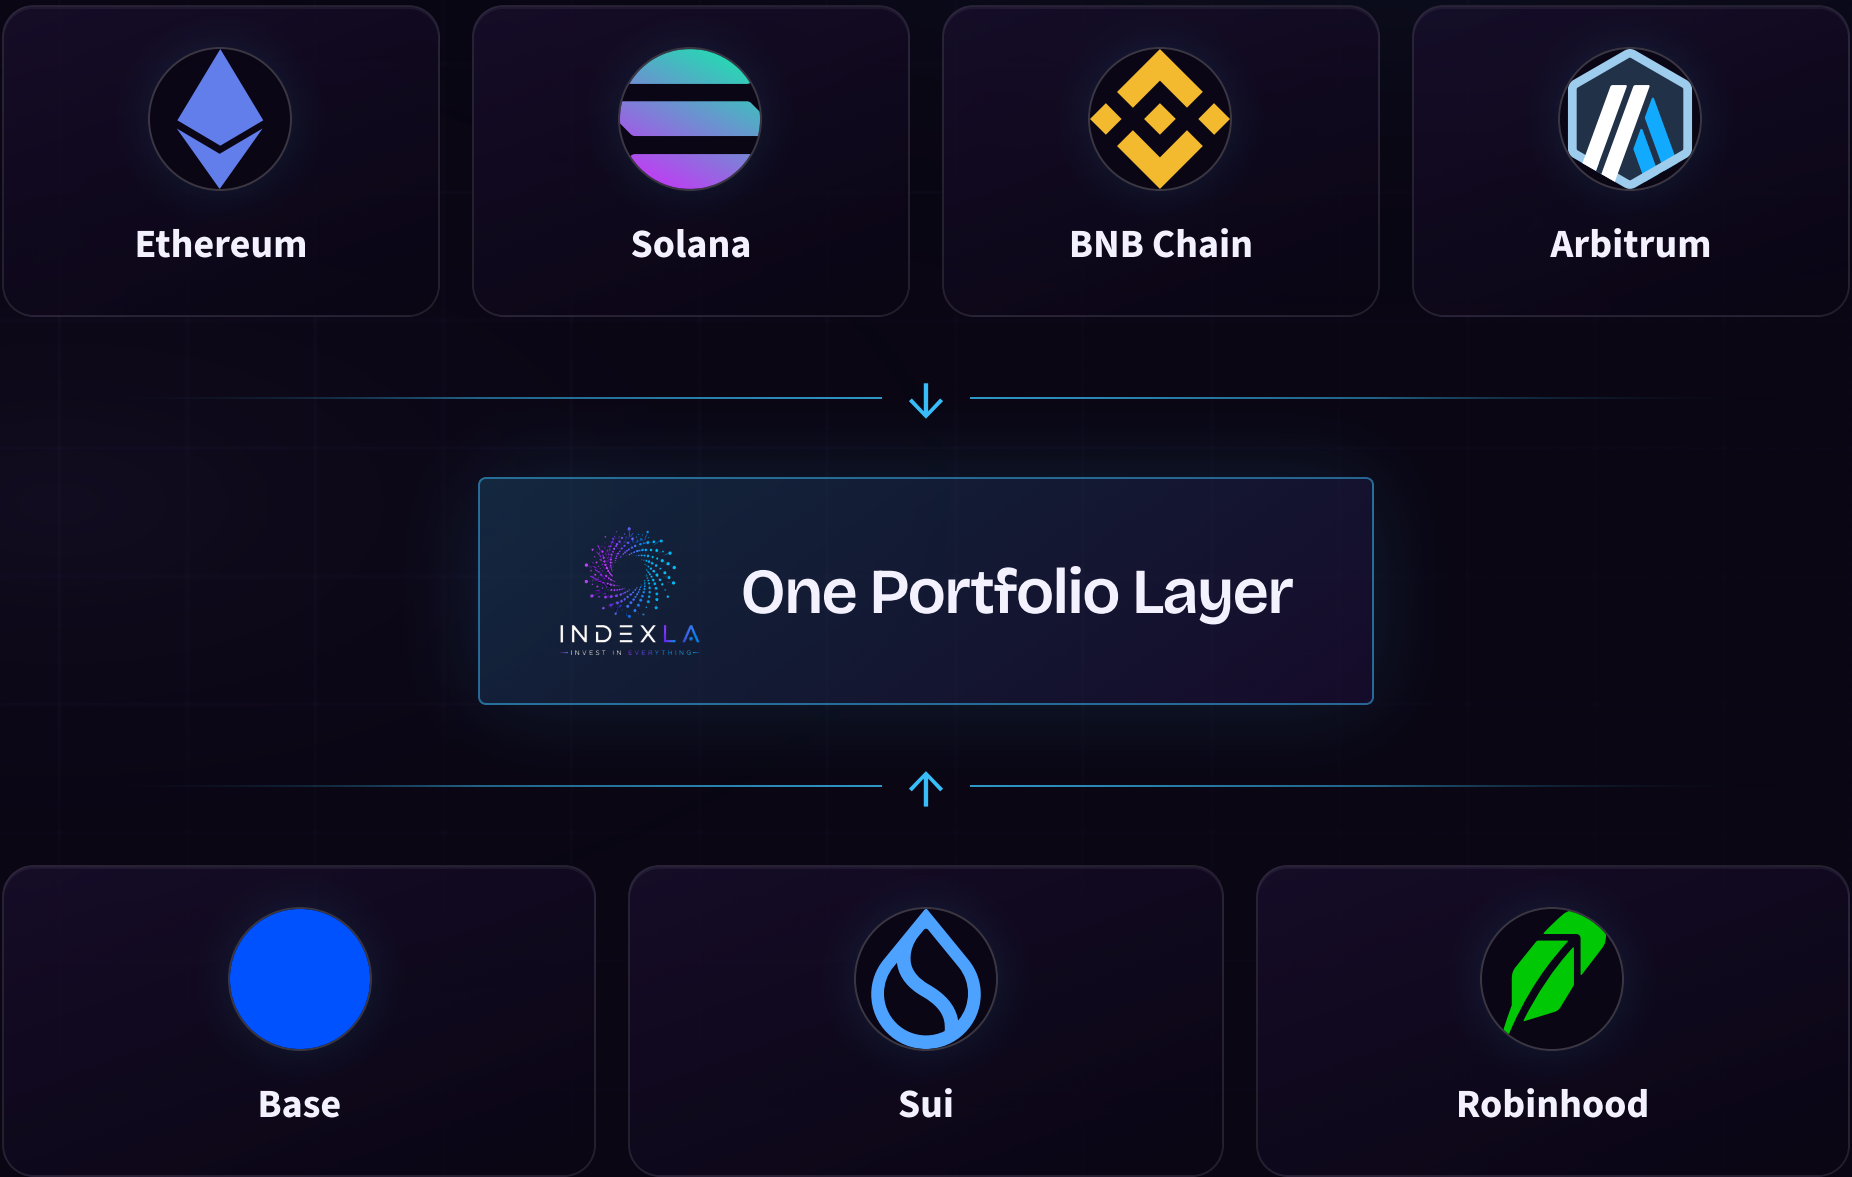

More assets. More chains. More wallets. More opportunities.

But discovery, portfolio construction and execution remain fragmented.

INDEXLA connects everything into one layer:

One portfolio layer for the expanding on-chain economy.

CREATORS ARE THE NEW DISTRIBUTION LAYER.

Creators already command attention and trust.

INDEXLA turns that social capital into executable financial products.

Creators don’t just use INDEXLA. They become the distribution engine.

MONETIZE ACTIVITY. CAPTURE VALUE.

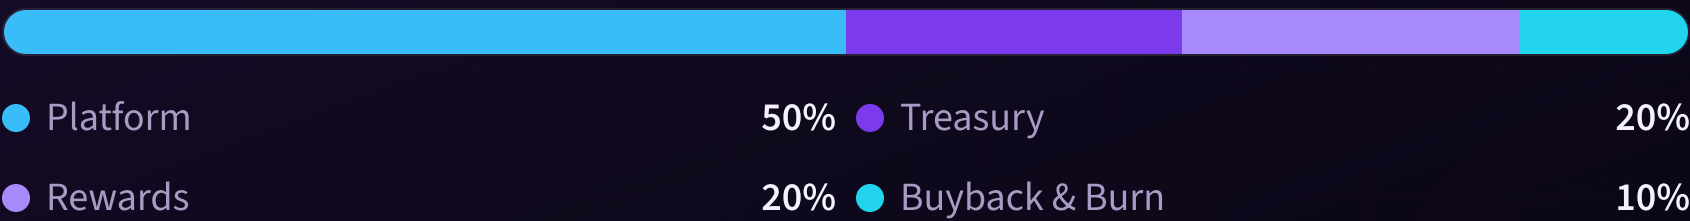

1% EXECUTION FEE

On every buy, sell, rebalance & automated execution.

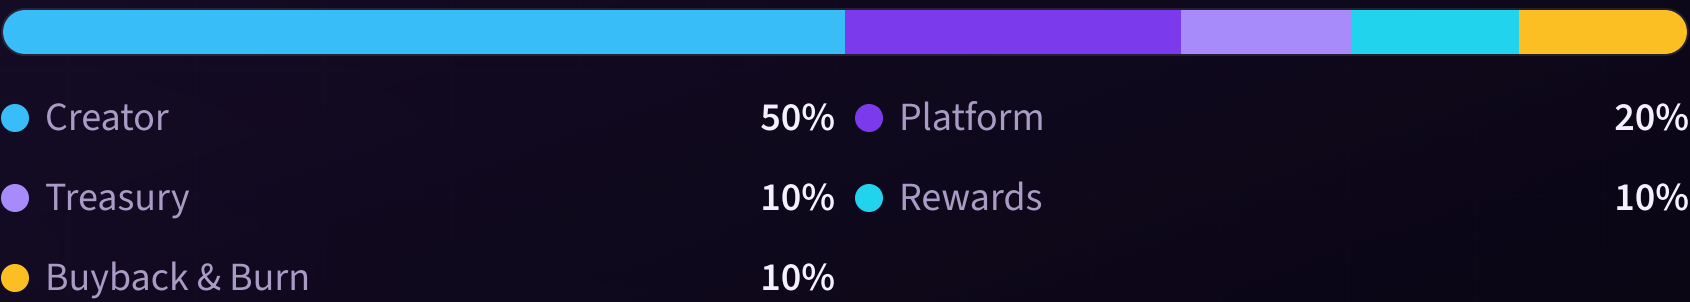

Execution Volume × 1% = Gross Fees

INDEXLA PORTFOLIOS

CREATOR PORTFOLIOS

INDEXLA captures value through platform revenue, treasury economics and \$DEXLA buybacks.

PATH TO SCALE

STAGE	TARGET AUM	EXECUTION VOLUME	GROSS FEES
Seed	\$5–7M	\$25–35M	\$250–350K
Private	\$20–30M	\$100–150M	\$1–1.5M
Public / TGE	\$40–50M	\$200–250M	\$2–2.5M

STAGE TIMING

Seed — Q4 2026 → Private — Q1 2027 → Public / TGE — Q2–Q3 2027

Stage targets based on ~5× execution volume across core portfolios + Degen Club.

THE VOLUME ENGINE

Core portfolios are designed for holding. Lower turnover → lower fee frequency.

Memecoins and high-velocity assets are major drivers of crypto attention, participation and trading activity.

Degen Club captures that activity in a structured way.

Instead of single-asset speculation, users can take multiple calculated positions inside one rules-based, automated basket.

Degen Club is INDEXLA’s deliberate high-velocity revenue accelerator — expanding market reach while generating the trading volume the core model needs.

THE ECONOMIC BACKBONE

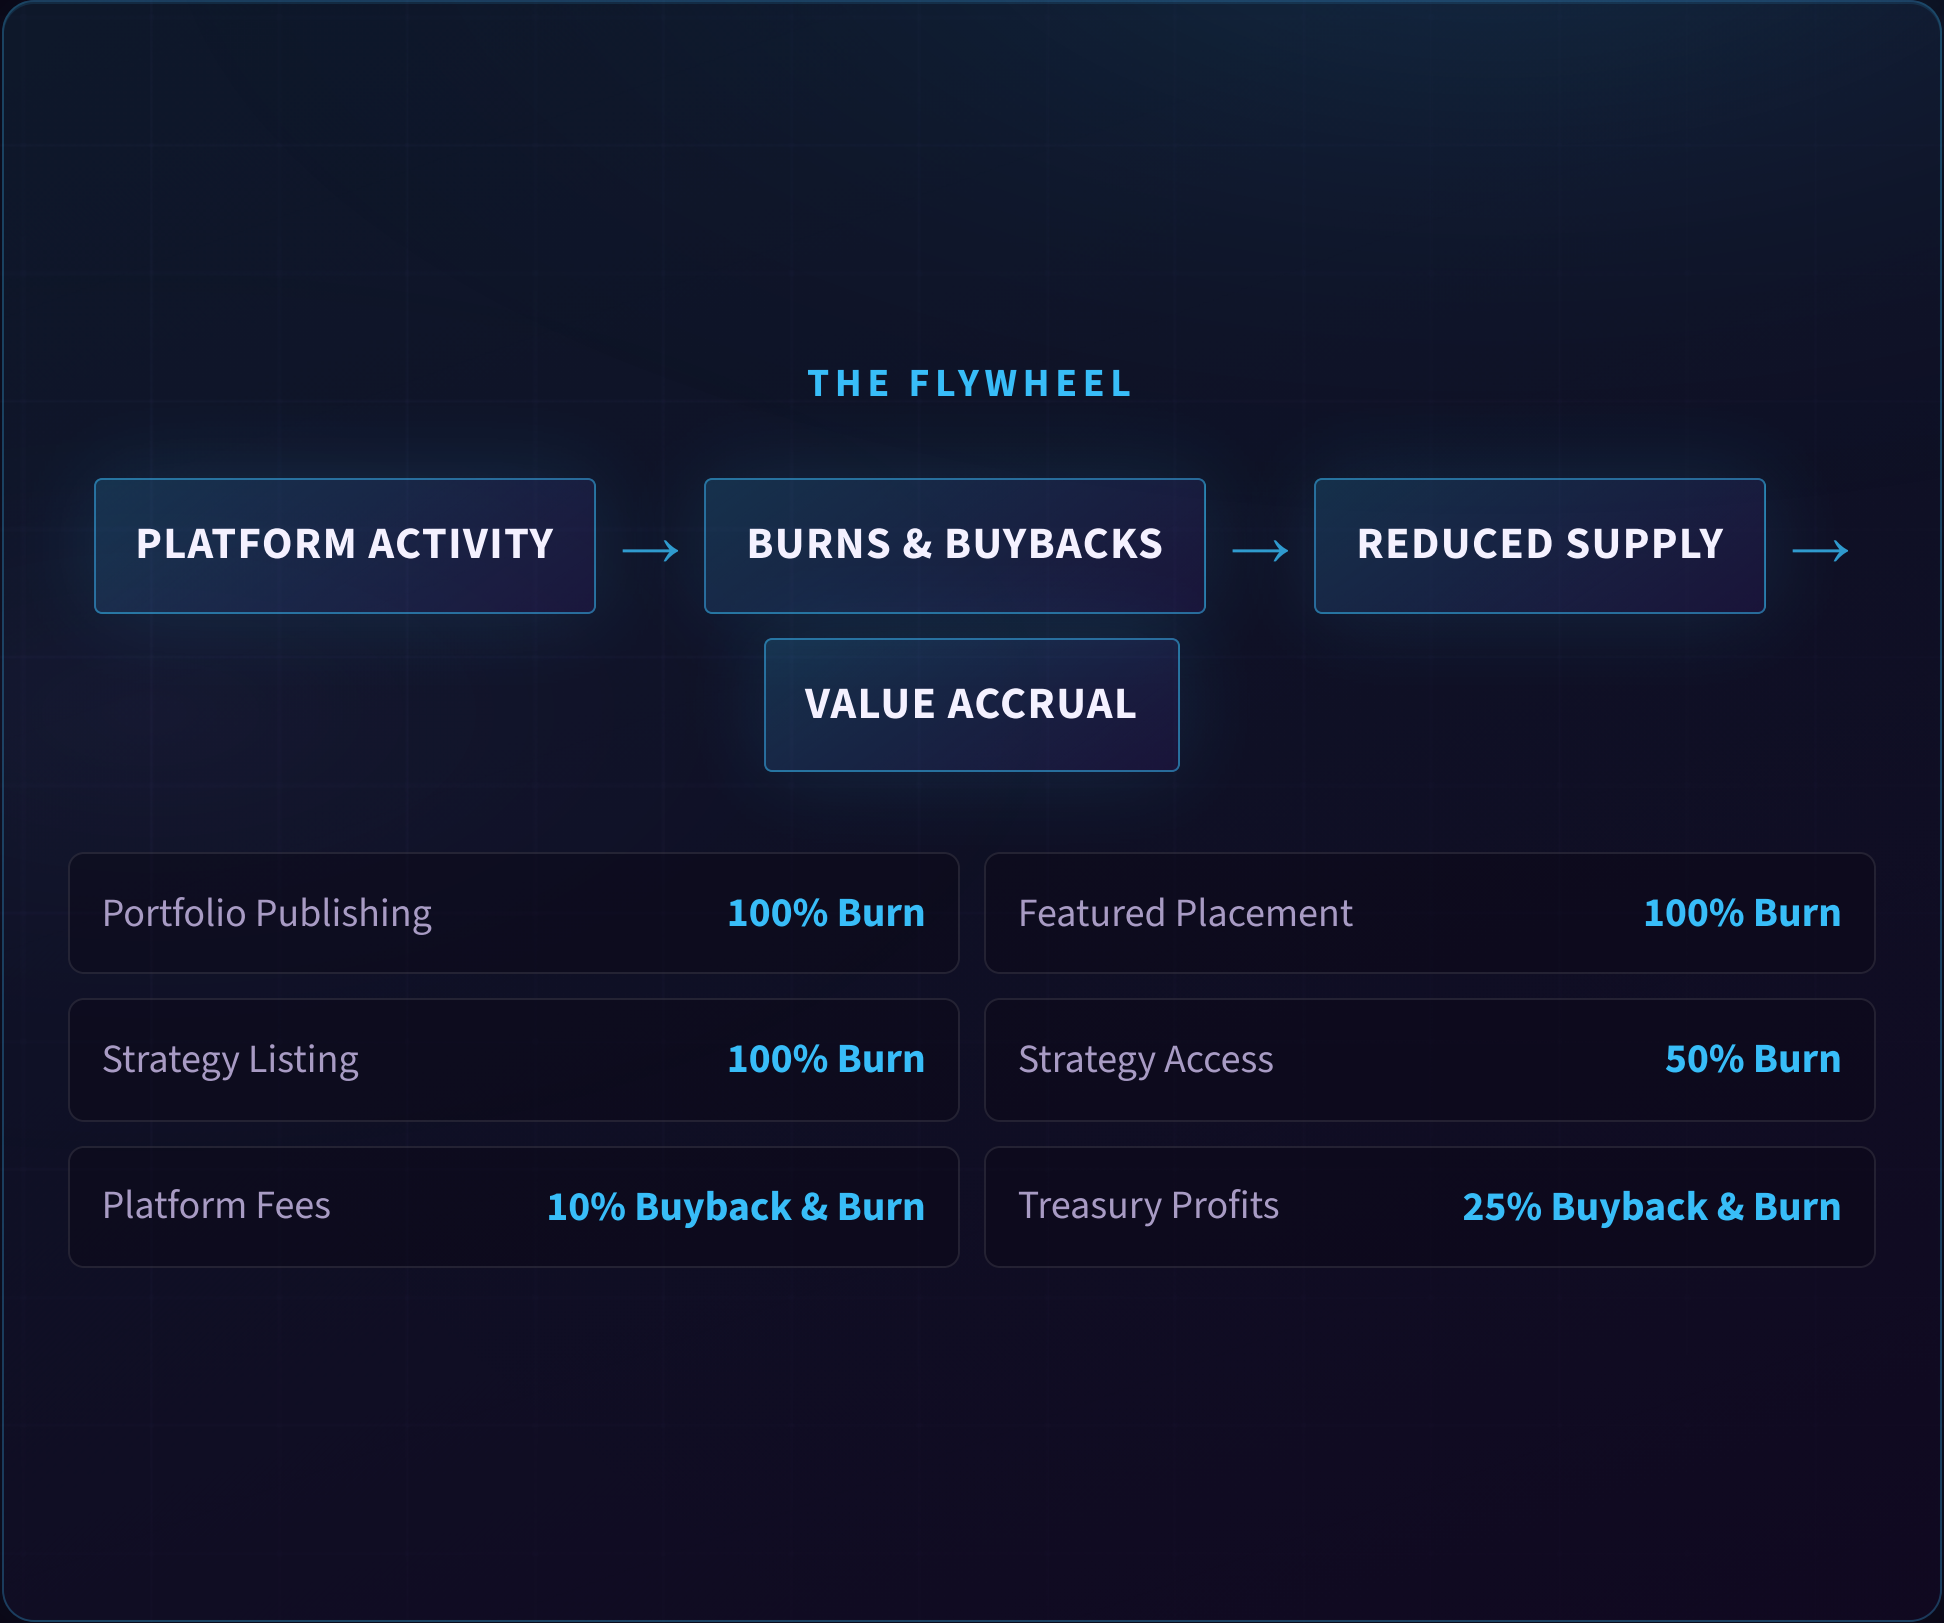

\$DEXLA is embedded across INDEXLA, powering platform utility, creator activity and value capture.

It is the exclusive token for publishing, featuring, accessing and monetizing strategies.

UTILITY

Publish	→ List portfolios
Feature	→ Promote portfolios
Discount	→ Unlock fee discounts
Tip	→ Support creators
Access	→ Pay for strategy access

INDEXLA generates the activity. \$DEXLA captures the value.

THE OPPORTUNITY

The missing link is no longer asset availability, it is the distribution and portfolio layer.

Asset Supply × Creator Distribution × Programmable Execution

INDEXLA sits at the intersection.

THE COMBINATION IS THE THESIS.

01 TRUE OWNERSHIP

Assets remain in the investor's wallet.

WALLET-FIRST · NON-CUSTODIAL

02 CREATOR DISTRIBUTION

Creators bring audiences → audiences become investors.

AUDIENCE → CAPITAL

03 CROSS-ASSET & CROSS-CHAIN

Crypto + Tokenized Assets + RWAs across multiple chains in one portfolio layer.

ONE PORTFOLIO LAYER

04 AUTOMATED EXECUTION

AI coordinates complex execution within user-defined rules without taking custody.

RULES · AI · NO CUSTODY

THE MOAT

Ownership × Creators × Cross-Chain × Cross-Asset × AI Automation

Interfaces can be copied. Creator relationships, strategy history and distribution compound over time.

INDEXLA OWNS THE INTERSECTION.

DISTRIBUTION IS THE GROWTH ENGINE

A multi-channel system drives AUM, volume and retention.

- 01

TOP CREATORS
Crypto KOLs + finance influencers → Quality AUM
- 02

DEGEN CHANNELS
Meme communities + high-velocity groups → Degen Club volume
- 03

DISTRIBUTION PARTNERSHIPS
Wallets + DAOs + RWA protocols → Organic distribution
- 04

OWN ACQUISITION
Brand + SEO + PPC → Scalable acquisition
- 05

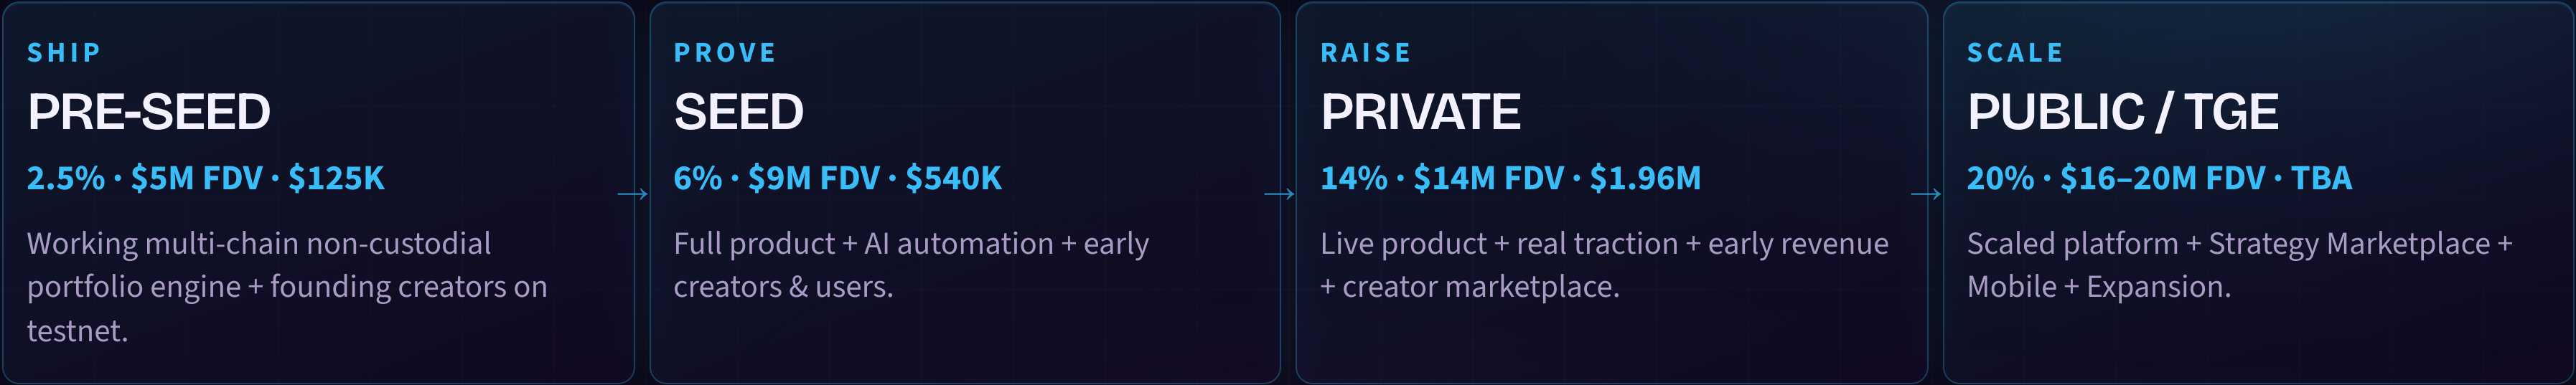

INCENTIVES
AUM / Volume-based rewards for early-user onboarding → Retention

FUNNELS
